

Evolution Power Solutions Inc.

We are seeking a highly skilled Journeyman Electrician to join our team, with a primary focus on commissioning natural gas turbines in the oil & gas industry. The successful candidate will be responsible for electrical installations, troubleshooting, and commissioning activities to ensure safe and efficient turbine operation. This role requires strong technical ability, field experience, and the ability to work in a dynamic industrial environment.

Key Responsibilities:

- Perform electrical installation, testing, and commissioning of natural gas turbines and auxiliary equipment.
- Interpret electrical drawings, schematics, and technical manuals.
- Conduct functional and performance testing of electrical systems to ensure compliance with standards and client requirements.
- Troubleshoot and resolve electrical and control system issues during commissioning and operation.
- Ensure compliance with electrical codes, safety regulations, and site-specific procedures.
- Work closely with engineers, technicians, and other trades during commissioning activities.
- Complete and maintain accurate documentation, including test records, reports, and as-builts.
- Provide support for maintenance and operational teams as required.

Qualifications & Skills:

- Journeyman Electrician certification (Red Seal or equivalent).
- 3+ years of industrial experience, preferably in oil & gas, power generation, or heavy industry.
- Commissioning experience with natural gas turbines or other rotating equipment considered a strong asset.
- Strong troubleshooting skills with electrical and control systems.
- Knowledge of PLCs, instrumentation, and protective relays is an asset.
- Ability to read and interpret technical drawings and documentation.
- Strong commitment to workplace safety and regulatory compliance.
- Excellent communication and teamwork skills.
- Willingness to travel and work in field/remote locations as required.

What We Offer:

- Competitive compensation and benefits package.
- Opportunity to work on large-scale oil & gas projects with industry-leading equipment.
- Professional development and training opportunities.
- A safety-focused, team-oriented work environment.
